

### Getting Started

Is your agency interested in exploring the benefits of Geographic Information Systems (GIS)? Getting started is easy and DTI can help. The GIS team at DTI can assist you when selecting computer workstations and appropriate software. DTI has even negotiated an Enterprise License Agreement with Esri, the State's GIS software vendor, that lets you purchase and license powerful GIS software at a reduced cost.

Once you are up and running DTI can assist in selecting appropriate training classes, some of which are available online for free. We can also make sure you get connected to FirstMap, Delaware's GIS repository that provides online access to GIS services containing the most current data available.

When you are ready to share your agency's data with other State Agencies or with the Public the DTI GIS team can assist you in publishing your data appropriately. You maintain control of your data and you decide if your data are published for public use.

Please contact us at [FirstMap@state.de.us](mailto:FirstMap@state.de.us) for assistance.
