Overview

The State of Delaware Enterprise GIS (FirstMap) system serves as a centralized repository for commonly used GIS data layers including, but not limited to, the framework layers used in base maps and aerial imagery. The repository supports inter-agency data sharing, facilitates data collection and updates, and through automated replication simplifies the process to find the most recent authoritative geospatial data for the state.

Services Connection Instructions

To connect to the map and feature services in ArcMap and ArcCatalog. Please see Connect to FirstMap 2.0 Services for ArcGIS Pro for instructions on connecting with ArcGIS Pro:

1. From ArcMap or ArcCatalog, select ‘Add ArcGIS Server’, then select ‘Use GIS services’.
2. From ArcGIS Pro, go to the Insert menu, click on ‘Connections’, then select ‘New ArcGIS Server’.
3. For the Server URL enter:
   a. Data: https://enterprise.firstmap.delaware.gov/arcgis
   b. Imagery: https://imagery.firstmap.delaware.gov/imagery
   c. Applications: https://apps.firstmap.delaware.gov/apps
4. Open the connection and begin using services.

Services through a Browser/Application

To utilize the map and feature services through a browser or in an application:

From any browser go to:
   a. Data: https://enterprise.firstmap.delaware.gov/arcgis/rest/services
   b. Imagery: https://imagery.firstmap.delaware.gov/imagery/rest/services
   c. Applications: https://apps.firstmap.delaware.gov/apps/rest/services
